

PORTABLE COMMUNICATION DEVICE HAVING AN OUTPUT UNIT
POSITIONABLE AND ROTATABLE WITH RESPECT TO AN
INPUT UNIT

ABSTRACT OF THE DISCLOSURE

A portable communication device, such as a personal digital assistant or wireless telephone, is disclosed. According to one embodiment, the portable communication device includes an input unit having a first coupling portion and an output unit having a second coupling portion. The first and 5 second coupling portions are adapted such that the output unit is positionable with respect to the input unit. In addition, the output unit is rotatable about at least a first axis and a second axis.
